

examination of the case.

No new matter has been added as the Heading is required by the MPEP, and the language is very clearly introductory in nature only. Also please note that that language is in fact present in the three priority documents, see for example Provisional SN 60/197,907 at page 25, lines 10 through 14. Since this case has been accorded the priority of those Provisionals and the subject matter has been incorporated by reference, no new matter has been added.

Entry of the amendment to the Specification is urged as being entirely appropriate.

Date: November 14, 2001
